(a) Global and context fidelity
Global CPC (nested)
Global CPC (flat)
Context NDCG (nested)
Context NDCG (flat)
Number of fine regions K
(b) Local ranking and distribution error
Context Top-1 (nested)
Context Top-1 (flat)
Global JSD (nested)
Global JSD (flat)
Number of fine regions K
(c) Support growth
Positive contexts (nested)
Positive contexts (flat)
Portal atoms (nested)
Portal atoms (flat)
Count (thousands)
Number of fine regions K
(d) Coverage-noise trade-off
Noise-dominated mass (nested)
Noise-dominated mass (flat)
Context coverage (nested)
Context coverage (flat)
Number of fine regions K
(e) Coarse-fine hierarchy consistency
Cross-parent cells (nested)
Cross-parent cells (flat)
Nodes in cross-parent cells (nested)
Nodes in cross-parent cells (flat)
Fraction
Number of fine regions K
(f) Signal dilution within the support
Mean signal/noise (nested)
Mean signal/noise (flat)
Atoms/context (nested)
Atoms/context (flat)
Ratio / count
Number of fine regions K
